EGYPTIAN ART
IN THE AGE OF THE PYRAMIDS

THE METROPOLITAN MUSEUM OF ART
EGYPTIAN ART IN THE AGE OF THE PYRAMIDS

THE METROPOLITAN MUSEUM OF ART, NEW YORK
DISTRIBUTED BY HARRY N. ABRAMS, INC., NEW YORK
This volume has been published in conjunction with the exhibition "Egyptian Art in the Age of the Pyramids," organized by The Metropolitan Museum of Art, New York; the Réunion des musées nationaux, Paris; and the Royal Ontario Museum, Toronto, and held at the Galeries nationales du Grand Palais, Paris, from April 6 to July 12, 1999; The Metropolitan Museum of Art, New York, from September 16, 1999, to January 9, 2000; and the Royal Ontario Museum, Toronto, from February 13 to May 22, 2000.

The exhibition is made possible by Lewis B. and Dorothy Cullman.

Additional support has been provided by The Starr Foundation.

An indemnity has been granted by the Federal Council on the Arts and the Humanities.

Educational programs have been supported by the Malcolm Hewitt Wiener Foundation.

The publication is made possible by The Adelaide Milton de Groot Fund, in memory of the de Groot and Hawley families.

Published by The Metropolitan Museum of Art, New York.

68. TRIAD OF KING MENKAURE

Fourth Dynasty, reign of Menkaure
Graywacke
H. 96 cm (37 1/2 in.)
Egyptian Museum, Cairo JE 46499

Discovered by George Reisner in 1908, this statue depicts King Menkaure flanked by two female figures. On his right stands the goddess Hathor, Lady of the Sycamore, identifiable by the cow’s horns surrounding a sun disk that she wears on her head. On his left is the personification of the nome (province) of Diospolis Parva, with the emblem of the goddess Bat above her head. Bat is depicted as a woman with cow’s horns, whose face is resting on an elaborate knot.

The three figures stand against a back slab that joins the base of the statue. All three are standing with their arms at their sides, and Hathor holds the king’s right hand in her left. An enigmatic object, identical to those held by the nome goddess, is visible in the sovereign’s left hand. Menkaure’s left leg is advanced, in the walking pose traditionally reserved for male figures. He is wearing the shendyt, or tripartite pleated royal kilt, and the white crown of Upper Egypt. No chin strap is visible. The treatment of the upper corners of the beard seems characteristic of the Fourth Dynasty. The two women are dressed in identical long, close-fitting sheaths, which partly reveal the details of their bodies beneath the sheer fabric. Each is wearing a tripartite wig with carefully incised locks. Despite their strong resemblance, a few differences are apparent: the left foot of the goddess Hathor is slightly advanced, and her face is turned to the side; the nome goddess faces straight ahead, her feet together and arms at her sides, and she is wearing a necklace.

The artist has rendered the shapes and musculature, especially of the king’s torso and legs, with a great deal of care and has paid particular attention to the harmony of the composition. Enhanced by the stone—a dark, perfectly polished graywacke—this triad is one of the masterpieces of Old Kingdom sculpture.

The group was found in the valley temple of Menkaure along with three other complete triads and one that is fragmentary. One complete triad and the fragmentary group (fig. 117) are housed in the Museum of Fine Arts in Boston; two other complete examples are in the Egyptian Museum in Cairo.

Although very similar at first glance, the triads differ in a number of their details. The inside arms of the figures standing beside the king sometimes hang straight down but sometimes are wrapped around the king’s torso, with the hand resting on his arm. The deities may hold either shen signs or enigmatic objects in their hands. In the complete triad in Boston the goddess Hathor is seated in the middle of the group, between the king and the nome personification. Scholarly opinion about the number and purpose of these triads has changed since they were discovered. It was first thought that there must have been about forty triads—one group for each Egyptian nome. Now it is supposed there were eight triads in all, symbolizing the principal sites where the goddess Hathor was worshiped.

69. HEAD OF MENKAURE

Fourth Dynasty, reign of Menkaure
Graywacke
H. 22 cm (8 3/4 in.)
Musées Royaux d’Art et d’Histoire, Brussels E 3074
Paris only

The formal perfection of this head is only slightly compromised by its mutilation. This is very probably a portrait of Menkaure, depicted with the attributes of kingship: the white crown, symbolizing his power over Upper Egypt, and the false beard, traces of which are visible on the right side of the chin. The subtle modeling of the magnificently polished stone may well faithfully capture the features of the king. The impression of fatigue conveyed by the drooping lower lids and the heavy cheeks bordered by folds in the surface of the skin is belied by the firmness of the straight mouth. The eyes are treated naturalistically: there is no cosmetic line extending to the temples, no ribbon-shaped eyebrows, but simply an outline emphasizing the upper eyelids.

The material, dimensions, and style of the work led Gilbert to link this head to a fragmentary triad in the Museum of Fine Arts, Boston (fig. 117). It is now generally accepted that this triad depicted Menkaure
between two figures, probably a goddess and the male personification of a province, or nome, of Egypt. The Boston fragment, which is carved in a remarkable style, comes from the valley temple of Menkaure. It belongs to an extraordinary series of statues representing the pharaoh in the company of the goddess Hathor and a male or female nome deity, recognizable by the emblem worn on the head. This theme was repeated in statues of other Old Kingdom sovereigns. Four admirable triads with Menkaure have been found intact at Giza: three of them, in the Egyptian Museum, Cairo, depicting the king standing with Hathor on his right and on his left, respectively, the nomes of Thebes (JE 40678), Cynopolis (JE 40679), and Diospolis Parva (JE 46499; cat. no. 68); the fourth triad, in the Museum of Fine Arts, Boston (09.200), is dominated by a representation of Hathor seated between two standing figures, the king on her left and the goddess of the Hare nome on her right. This series of triads is notable for the high slab against which the figures stand. Several fragments of similar groups were discovered in Menkaure’s valley temple. We do not know how many there once were: perhaps more than thirty, each corresponding to a different nome, or, according to current opinion, perhaps as few as eight, one in each of the chapels in the foretemple, to represent the principal cities where Hathor was worshiped.

The group to which this head belongs is distinguished by the splendid modeling of the goddess’s body; she is standing to the right of the king and holding his hand. The king is also depicted standing, dressed in a shendyt kilt with fine pleats. The third figure has his arm around the king’s shoulders. The subtle treatment of this male figure’s bones and musculature, like the treatment of Menkaure’s head, attests to the sense for sculptural form attributed to the workshop of Sculptor B (see introduction to cat. nos. 56–63). 1

PROVENANCE: Giza, valley temple of Menkaure; gift of Baron Edouard Louis Joseph Empain 1910

BIBLIOGRAPHY: Reisner 1931, p. 110 (13), pl. 46/1 (on the body); Gilbert 1961, pp. 49–53, figs. 2, 3 (on the relationship between the body and this head); Porter and Moss 1974, pp. 28–29; Tefnin 1988, p. 19, no. 2 (on this head)

In July 1908 this head and two others (in which the king is shown wearing a nemes headcloth) were uncovered during George Reisner’s excavations in the valley temple of Menkaure’s pyramid complex at Giza. Other statue fragments, including four bases inscribed for the king, were also discovered. Only one figure could be fully reconstructed, but the similarities of stone and scale suggest that this head belonged to one of at least four lifesize seated statues of Menkaure that were set up in the offering hall of the temple. Although the three heads were carved in slightly varying styles, they clearly represent the same person. The knobbed chin, well-formed mouth, full cheeks, and prominent eyes are seen in other representations of Menkaure, such as that in the pair statue in this catalogue (cat. no. 67). The profile, with its prominent browridge, rounded nose, and deeply undercut lower lip, is especially recognizable as belonging to this king. 3

Menkaure wears the ceremonial royal beard and has a uraeus at his forehead. The cobra’s head, which has been reattached, juts out from the surface of the stone, but its open hood is carved almost flat against the king’s hair, without any delineation of the reptile’s body down the center of the hood. Behind the hood, extending across the top of the king’s head almost to its crown, the serpent’s thick body forms six compressed curves. 4 The piece is unusual because it represents Menkaure with short-cropped hair instead of a crown or nemes headdress. The hair is indicated by irregular striations that do not extend to the sideburns and have not been completed at the back of the skull. This way of representing short hair is occasionally seen in nonroyal sculpture, as, for example, in the wood statue known as the Sheikh el-Beled (fig. 34). By contrast, the hairstyle when shown in royal statuary is usually indicated in a more formal fashion, using a series of concentric bands, as in a fragmentary royal head in the Petrie Museum, London (cat. no. 101). However, the more irregular
